

Toray Textiles Europe Limited Sustainability Policy

‘Have a strong heart to do the right thing in the right way’

Guided by the Toray Group Sustainability Vision and Ethics & Compliance Code of Conduct and based on the principle that we must actively promote environmental preservation, we intend to continuously reduce the impact that our business activities, products and services have on the environment, while also promoting diversity and sustainable use of resources. Sustainable development can maintain the balance between economic business sustainability, environmental protection and social equality.

TTEL will proactively pursue continuous improvement towards the circular economy and reduced greenhouse gas emissions through involvement of all stakeholders, customers, suppliers and employees.

Use of biomass materials, recycling, renewable energy and process water recovery will contribute to the development of the circular economy.

In line with TORAY VISION 2030 to “achieve sound, sustainable growth and create social value” – we will implement actions to reduce GHG emissions and water consumption per unit sales compared to 2013 level.

By providing periodic updates on the progress of sustainability and environmental projects and performance, TTEL will adopt transparent communications with all interested parties.
